

FRAG BLAST | 12

TECHNICAL TOUR

Mining tour

Together with the Fragblast Symposium, this two-day Mining tour takes you on a memorable journey through the northern mining district of Sweden. The tour is limited to 50 participants.

First stop will be in Aitik, just south of Gällivare. Aitik is Sweden's largest open-pit copper mine and is often seen as the world's most efficient open-pit copper mine.

Second stop will be LKAB's famous Kiirunavaara mine. The mine is the largest and most modern underground iron ore mine in the world.

Warmly welcome!
